To whom it may concern:

I highly recommend the work of Nora Zothová as the Czech Developer for Mango Languages. Nora has served as a developer for our Czech course from April 2010 until July 2010. Mango Languages is an on-line language learning company that uses conversations to teach students a new language. Nora's responsibilities included translating twenty chapters and creating over one hundred grammar and cultural notes. She continually demonstrated her knowledge of living in the Czech Republic and its language. She excels in maintaining open and professional communication by utilizing email and Skype™. She has the ability to communicate clearly in Czech and English. She finishes tasks within a reasonable amount of time and often before a deadline. Nora works well on a team. Because of the efforts of Nora and our Czech Editor, Czech was one of the first language courses to be completed. I thoroughly enjoyed working with Nora Zothová and was continually impressed by the quality of her work.

Sincerely,

Caitlin Richardson
